

**PL110 LAT PULLY**

- > **Length:** 150cm
- > **Width:** 147cm
- > **Height:** 200cm
- > **Weight:** 148kg
- > **Maximum load:** 300kg
- > **Starting weight:** 2.5kg

- > **Independent movement in order to make sure a correct training, balanced** with a biomechanic design for a perfect contraction
- > **Divergent** movement in order to make an overall workout
- > **4 racks** reinforced for plate storage
- > Ultra solid **steel chassis**. Combination of two kind of tubes: 76mm diameter circle tube and 100x50mm oval tube; both with 3mm width. **TIG welding in all the union points.**
- > High durability **stainless screws**
- > **Ergonomic** adjustment lever
- > The seat adjustment is **mechanic with an hidraulic compensator**. It has an articulated quadrilateral structure made on steel with the hydraulic aid.
- > Possibility to adjust **the knee-holder rollers**, which are also designed with a positive lateral inclination to adapt to more users
- > **Fireproof upholstery** made in hi-density polyfoam for more confort and reliability.
- > **High precision industrial ball bearings** to ensure smooth operation and protection against corrosion.
- > **Elastic adjustments** that allow the user to adapt easily and accurately to the machine
- > Rubber protections on the supports to avoid scratthes.
- > **Anti-slip aluminum grips** for the best feeling during exercise and the greatest guarantee for durability
- > **Diameter** of the grips: 38cm
- > Due to the **variety of settings and adjustments**, it offers a wide range of positions for anyone to use the machine
- > **Reinforcements of stainless steel in the base** to support feet and provide greater robustness.
