

**PL130 BICEPS**

- > **Length:** 150cm
- > **Width:** 125cm
- > **Height:** 124cm
- > **Weight:** 118kg
- > **Maximum load:** 100kg
- > **Starting weight:** 5.5kg

- > **Biomechanics design** for a perfect lineal movement curve that guarantees an equilibrate exercise.
- > Very resistant and durable pull strap.
- > **Counterbalanced for a better balance** when doing the exercise.
- > **2 racks** reinforced for plate storage
- > Ultra solid steel chassis. Combination of two kind of tubes: 76mm diameter circle tube and 100x50mm oval tube; both with 3mm width. TIG welding in all the union points.
- > High durability **stainless screws**
- > Ergonomic adjustment lever
- > The **seat adjustment is mechanic with an hidraulic compensator**. It has an articulated quadrilateral structure made on steel with the hydraulic aid.
- > **Fireproof upholstery** made in hi-density polyfoam for more confort and reliability.
- > **High precision industrial ball bearings** to ensure smooth operation and protection against corrosion.
- > Diameter of the grips: 38cm
- > **Elastic adjustments** that allow the user to adapt easily and accurately to the machine.
- > **Rubber protections on the supports** to avoid scratthes.
- > **Anti-slip aluminum grips** for the best feeling during exercise and the greatest guarantee for durability.
- > Due to the **variety of settings and adjustments**, it offers a wide range of positions for anyone to use the machine
